MOTOR BUILDERS OF ROSTOCK

industry reports that a 1,000 H.P. motor is under construction at the Diesel Motor Factory in Rostock. The shaft is being delivered by the Oerblistal firm from Saxony and will be tempered by the E.K.W. (Energie-und Kraftmaschinenbau) of Berlin-Johannistal.

Production of 80 and 100 H.P. motors for Albania and Poland has been undertaken, as well as 100 H.P. auxiliary motors. The 1,000 H.P. motor has six cylinders, and is furnished with a booster unit that will allow it to reach 1,400 H.P.

The "Vorwaertz" made four trips in September, two to Windau, and two to Gdingen, with buna and cement. She returned in ballast. In October she made two trips to Memel and two to Gdingen. The Gdingen trips were to carry motors for export to China.
